CLAIMS

We claim:

1. (Currently amended) A method for bringing new data to a Web page displayed in
Microsoft Web browser window ~~the application window~~ at a client device, the method
5 comprising:

displaying, in Microsoft Web browser window ~~the application window~~ of a client
device, a Web page, wherein said Web page no longer has any active
HTTP connections;

transmitting, to a server, an HTTP request; and

10 receiving, from said server, an HTTP response associated with said HTTP
request,

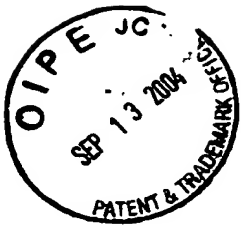

wherein the transmitting and receiving actions do not utilize Web browser plug-in, Java
Applet, or ActiveX technology, and do not add a Universal Resource Locator (URL) to
said application's history list.

15

2. (Original) A method as defined in claim 1, wherein information in said HTTP
response is delivered to an HTML element of a Web page that is capable of loading a text
file.

3. (Canceled) A method as defined in claim 2, wherein said application window is a
20 Microsoft application window.

4. (Canceled) A method as defined in claim 2, wherein said application window is a
Microsoft Web browser window.

5. (Currently amended) A method as defined in claims 2, 3, ~~and 4~~, wherein information in said HTTP response is delivered to an HTML <script> element of a Web page.

6. (Original) A method as defined in claim 5, wherein information in said HTTP

5 response contains only one JavaScript instruction or line of JavaScript code.

7. (Original) A method as defined in claim 6, wherein said JavaScript instruction automatically executes a JavaScript function defined in said Web page.

8. (Currently amended) A method as defined in claims 2, 3, ~~and 4~~, wherein information in said HTTP response is delivered to an HTML <iframe> element of a Web
10 page.

9. (Currently amended) A method as defined in claims 2, 3, ~~and 4~~, wherein information in said HTTP response is delivered to an HTML <xml> element of a Web page.

10. (Currently amended) A method as defined in claims 5, 8, or ~~and~~ 9, wherein said
15 information from said HTTP response is displayed on said Web page.

11. (Currently amended) A method as defined in claims 5, 8, or ~~and~~ 9, wherein said information from said HTTP response is processed by program code of a Web page.
